Award-winning BSS solutions

ZIRA WBRM Billing & Settlement 6.0 is an award-winning and modular wholesale solution that provides full coverage of revenue monetization process and enables telecoms to automate their wholesale business. With focus on high-performance, ZIRA WBRM Billing & Settlement provides Telecoms with an innovative set of functionalities for reliable invoice generation and distribution, accurate invoice assurance, fast dispute resolution, convergent multiparty settlement and user friendly financial management.

Our Solutions For Your Business Excellence

ZIRA WBRM Billing & Settlement is fully adaptable to multi-vendor legacy environments and is able to enhance existing wholesale business without any need for legacy replacement. It provides a smart and consolidated view of financial and operational data automation, converging all wholesale services on a single platform.

▶ Automatic Processing of Partner Invoices

Embed Optical Character Recognition technology ensures fully automated load and verification of incoming invoices regardless of it is received as PDF or paper-scanned invoice. Furthermore invoice verification on item level shortens the dispute time, by both cutting it short or pinpointing the subset of population in question.

▶ Dispute Management

For any incoming Supplier's Invoice, system automatically perform validation and itemized reconciliation enabling just and accurate dispute (full or partial) raise on error in rate, volume, currency etc.. Dispute Management secures accuracy and consistency of all user disputes raised or received over the time until resolved for improved cash-flow forecast and stability.

▶ Wholesale Invoicing

Solution provides fully featured billing functionalities for all wholesale services: voice, capacity, IP, Roaming and others. Unlocking real flexibility, the solutions enables fast and reliable itemized invoice generation and distribution with ability for templates personalization to each partner. Real time traffic measurement & monitoring enables Credit risk exposure control and threshold based alarming & notification.

▶ Convergent Netting and Agreement Handling

Systems unique ability to net "whatever you throw in", i.e. full or partial settled invoices, adjustments, resolved disputes etc. By fully supporting business convergence, all wholesale services can be combined within one settlement netting proposal statement. Driven by latest market needs, Solution fully supports multiparty business models, providing revenue share functionality, credit and debit notes management and deposit and payment tracking.
